

The industrial partner for metal processing

Sewage technology

We are a german manufacturer of penstocks, valves and fittings for water technology, sewage technology and waste water treatment technology. We manufacture casted valves, penstocks and pipe fittings according to DIN standards, which are carried out for a various range of applications. Our products are characterised by their durability, technical precision and reliable performance. Besides our broad range of standardised products, we specialise in individual product solutions.

Sewage technology

Welded penstocks and valves

- Wall-mounted penstock
- Channel penstock
- Wall-mounted throttle penstock
- Cast iron wall-mounted penstock
- flange mounted penstock
- Hand-pull penstock
- Handstop
- Channel penstock
- Weir gate
- Weir penstock
- Telescopic mellmouth
- Flap valve

Drives

- Manual and automated drives
- Transportable e-actuator

Stop log

- Flood protection
- Stop log
- Dam board

Casted valves and pipe fitting accessories

- Knife gate valve
- Flange gate valve
- gate valve
- Non-return valve
- Wafer type butterfly valve
- Butterfly valve
- Dismantling joint
- Fitting
- Bend

Basin and shaft equipment

- Tilting weir
- Diverter gate
- Spillway
- Scumboard
- Deflector plate
- Grid screen

Additional products

- Position indicator
- Lubricator
- Cover
- Sealings
- Emergency slide valve control

Services

- Product development
and construction
- Documentation
- Assembly
- Reparatüre
- Inspection and maintenance

Special solutions

On request

- Divided penstocks
- Stop logs for flood protection made from
aluminium or stainless steel
- Penstocks in special sizes with or without
electric / hydraulic drive
